DETAILED ACTION

Claim Rejections – 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Williams et al (US 6,097,801).
2. In regards to claims 1, 5, 8, 9, and 11, Williams discloses a method and system for notifying a component of a service provider associated with a telephone system, wherein the service provider receives a block of telephone numbers including contaminated (non-portable) and uncontaminated (portable) numbers within a received block of telephone numbers, the contaminated numbers being unavailable for use by the receiving service provider, the method comprising: requesting a block of telephone numbers from a number pool; receiving the requested block of telephone numbers from the number pool; retrieving from a database (database 34) a list comprising a plurality of contaminated (non-portable) numbers included in the received block of received numbers; and retrieving from a database (database 34), a location routing number of a switch (switch 30 and switch 47) associated with the plurality of uncontaminated

(portable) numbers included in the received block of numbers (col. 9 lines 11-30 and col. 10 lines 2-16).

3. In regards to claims 2 and 10, Williams discloses the method and system, comprising receiving the list of contaminated numbers and the location routing number from a single database (col. 9 lines 11-18 and col. 10 lines 26-36).
4. In regards to claims 3 and 6, Williams discloses the method, further comprising transmitting the list of contaminated numbers to a component of the service provider (col. 9 lines 19-30).
5. In regards to claims 4 and 7, Williams discloses the method, wherein the component comprises a billing system (col. 1 lines 61-64).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Patel (US 6,047,056) teaches a method to suppress number portability database queries for calls routed on non-ported numbers.
7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thjuan P Knowlin whose telephone number is (703) 308-1727. The examiner can normally be reached on Mon-Fri 8:00-4:30pm.
